

Opening Exercise – Session 2

Math, is it magic?

- Take the numeric value for your birth month and add 32
- Take 12 and subtract your birth month
- Add these to results together
- Now, Divide this total by 2
- Add three to this total
- Using the code A=1, B=2, C=3, ... Z=26; think of a color that begins with the letter represented by your final number
- The color you are thinking of is.....

Is this magic?

Can you come up with an equation that shows what we just did?
